Vidit Doshi

Data Analyst
Chicago, IL | (312)358-2332 | viditdoshi23.work@gmail.com | linkedin.com/in/viditdoshi46

SUMMARY

Data Analyst with 3+ years of experience leveraging SQL, Python, Tableau, Power BI to translate complex product and transactional data into strategic business decisions. Specializes in KPI root-cause analysis, retention analytics, and automating data validation workflows to deliver trusted, actionable insights to cross-functional stakeholders.

TECHNICAL SKILLS

- **Languages & Tools**: SQL (advanced), Python (Pandas, NumPy, SciPy), Git, MS Excel (advanced), dbt
- **Data Platforms**: Snowflake
- **BI & Visualization**: Tableau, Power BI (DAX), Plotly, Streamlit
- **Analytics & Statistics**: A/B testing & experimentation, Cohort & Funnel analysis, Forecasting & Scenario Modeling, Anomaly detection, Predictive modeling, Hypothesis Testing
- **Business & Delivery**: Requirements Gathering (BRDs), KPI definition, Root-Cause Analysis, Data Validation, Stakeholder Presentations, Agile, Scrum
- **AI Tools**: Claude Code, ChatGPT, Codex

PROFESSIONAL EXPERIENCE

University of Illinois | ***IT Support Associate (Technical Business Analyst)*** **06/2026 - Present**

- Analyzed 2,500+ support tickets using SQL and Excel, driving workflow optimizations reducing average resolution time by 20%.
- Gathered requirements from 150+ users to troubleshoot system roadblocks, automating technical workflows to decrease user errors by 15%.
- Built Power BI dashboards to track daily helpdesk KPIs, improving SLA compliance from 82% to 96% in three months.

Research Data Specialist (Data Analyst) **08/2025 - 05/2026**

- Cleaned and transformed 500,000+ research records using Python and SQL, resolving anomalies to ensure 100% data integrity.
- Designed 5 Tableau dashboards to visualize key experimental metrics, enabling rapid stakeholder decisions and reducing data-retrieval time by 30%.
- Automated manual data collection workflows with Python scripts, saving 12 hours of processing per week and accelerating research timelines.

EXL | ***Business Analyst*** **10/2021 - 05/2023**

- Managed funnel and retention analytics for 5M+ customers using SQL and Tableau, surfacing friction points to inform 4 major roadmap decisions.
- Diagnosed a 12% activation drop through data segmentation, driving a targeted onboarding fix that recovered 9 points in 6 weeks.
- Led pre- and post-launch analysis for 8 feature releases, recommending 5 data-backed optimizations that lifted overall adoption by 18%.
- Automated recurring data prep using Python and scheduled SQL extracts, reducing reporting effort by 15% and deploying 4 Tableau dashboards for quarterly prioritization.

EDUCATION

University of Illinois Chicago | ***M.S., Management Information Systems*** **08/2023 - 05/2025**

NMIMS University | ***B.Tech., Data Science*** **07/2017 - 08/2021**

PROJECTS

Transaction Fraud Detection & Triage Dashboard | Dashboard

- Designed an interpretable fraud-detection system whose top 1% of alerts capture over half of all fraud dollars.
- Turned model scores into a cost-based review policy, delivered as a Tableau decision dashboard.

Credit-Card Churn & Lifetime Value Dashboard | Dashboard

- Paired churn prediction with customer lifetime value to surface $4.5M in at-risk revenue.
- Built a save-offer ROI model that sizes the retention campaign and outputs a targeted call list.
